WCC COMMUNITY FORUM IN CHEMISTRY

“Climate Change: The Elephant in the Room”

12:00-1:00 pm, Thursday, Oct 29, 2015
Paliku Theater, Windward Community College

Stuart Scott

This presentation is about the under-reported but crucial aspects regarding climate change. In this talk, he will identify and discuss the deepest roots of the problem and offer strategies both for mitigation and adaptation, in the hopes of avoiding the worst of what is coming.

Stuart Scott was the first environmentalist stockbroker on Wall Street in the 1970s, ran an IT consultancy for major NYC banks in the 1980s, then a software engineer for IBM in the 1990s. More recently he has been a university instructor of mathematics, statistics, and critical thinking in Honolulu, but left academia in 2008 to engage in full-time international climate and ecological advocacy, participating at the UN climate negotiations and presenting hundreds of climate briefings both in the US and internationally. Currently he is Deputy Director General of the International Ecological Safety Collaborative Organization (IESCO), and is the Founder and Director of Strategic Planning of the United Planet Faith & Science Initiative (UPFSI.org).

This forum is co-sponsored by Windward Community College and the American Chemical Society-Hawaii Section.
